

MINOR IN BIOMEDICAL SCIENCES

Program Contact: Robert Cottrell (robert.cottrell@qu.edu) 203-582-8676

The Department of Biomedical Sciences offers a minor in Biomedical Sciences, which provides students with a fundamental knowledge of the theories, principles and advances in these basic sciences. Completing this area of concentration may help students qualify for employment in the pharmaceutical and biotechnology industries; the medical diagnostics industry; university-based biomedical research; and city, state and federal health/research laboratories or to continue their education in graduate/professional school. This concentration helps students develop critical thinking skills and understand and utilize modern research laboratory technologies.

The minor in Biomedical Sciences requires a minimum of 18 credits, all with a grade of C or better, for completion.

At least two courses must be lab-based. No more than two classes may be transferred in from other institutions. The same course cannot count toward both a minor in Microbiology and Immunology and a minor in Biomedical Sciences.

Graduate courses may count for the BMS minor with permission from the department chair.
